KINGSTON SHAW TURNS UP THE BLING

Kingston Shaw Interior Design has recently completed the refurbishment of the public spaces in the iconic Bling Bling Building, Liverpool.

Working with Grosvenor Developments on the project to upscale the entrance, landings and stairwell, Kingston Shaw have utilised their sophisticated design skills to redefine the space.

The feature lighting is courtesy of Tom Dixon and has been used to effectively pool light on the entrance. New flooring from Bolon combining glamour and practicality is carried through the building for continuity.

Working on the Project for Kingston Shaw, Project Director Annmarie Lea said “this building represents the new Liverpool, our design is strong and like the building itself with a sense of humour!”
